IN THE CLAIMS

APR 08 2003

1. (Original) A case for confining a circuit card to a particular technology center 2800 within a housing, the case comprising:

a slot; and

an actuator disposed within the slot, the actuator engageable with the circuit card for clamping the circuit card between the actuator and the case.

2. (Original) The case of claim 1, wherein the actuator is one of a wedge, cam, and resilient element.

3. (Original) The case of claim 1, wherein the circuit card is in slidable contact with the case.

4. (Original) The case of claim 1, wherein the case is thermally coupled to the housing.
